## CLOUD COST ESTIMATION

### CLOUD COMPONENTS COST:

- **AWS EC2 Instance:**  
A small instance like t2.micro or t3.micro (for small/medium apps) is free for first year under AWS Free Tier

**Cost After Free Tier: ~\$9 to \$10 per month** for t2.micro instance running 24/7.

- **AWS Elastic IP:**  
First IP is free if instance (app) is running. Otherwise, it's around **\$3.65 per month**.
- **Data Transfer:**  
15 GB is free, after that it costs about **~\$0.09 per GB**.
- **AWS S3 Storage:**  
First 5 GB is free, after that it costs **~\$0.023 per GB**.
- **AWS RDS (Database):**  
**~\$15 per month** after a free tier of one year.
- **AWS Route 53 (DNS Service):**  
**~\$0.50 per hosted domain per month.**  
**~\$0.40 per million DNS queries for the first 1 billion queries.**
- **SSL Certificate:**  
Free under AWS Certificate Manager.

**TOTAL CLOUD COST: \$10-\$30 per month [Usage Depended]**

## **DOMAIN NAME COST:**

- **From AWS Route 53:**  
.com domain: Typically around **\$12 per year**.

## **TOTAL ESTIMATED COST:**

**\$10-\$15** for the domain name for the first year. After that **\$20-\$45** for cloud hosting [per month] as well as domain renewal each year.

## **TOTAL COST [COMPANY + HOSTING]**

First Year, Company cost is 120 to 132 pounds and cloud domain name cost is 7 to 13 pounds, leading to **127 to 145 pounds**. Next Year Onwards, company cost 72 to 82 pounds while cloud hosting with domain name costing will be **17 to 42 pounds [Usage Dependent]**, leading to total cost **89 to 124 pounds**.
